

# Adit Deshpande

MACHINE LEARNING ENTHUSIAST · TECHNICAL BLOGGER · KAGGLE COMPETITOR · O'REILLY AUTHOR

☎ (408)250-8152 | ✉ [adeshpande3@ucla.edu](mailto:adeshpande3@ucla.edu) | 🏠 <https://adeshpande3.github.io/> | 📱 [adeshpande3](#) | 📺 [aditdeshpande](#)

## Education

### UCLA (University of California, Los Angeles)

B.S. IN COMPUTER SCIENCE, GRADUATION DATE: 2019, GPA= 3.43

*Los Angeles, CA*  
*Sept. 2015 - PRESENT*

- Frameworks/Libraries Used: Tensorflow, Numpy, Pandas, Scikit Learn, Matplotlib
- Languages: Python, C++, C, Matlab

## Experience

### Clarifai

APPLIED MACHINE LEARNING INTERN

*New York, NY*  
*June 2018 - Aug. 2018*

- Created internal tools to check the accuracy of image labeling from human workforce services.
- Built evaluation scripts to assess and visualize performance of Clarifai's base image recognition models.
- Created demo webpages to showcase Clarifai's detection models during internal meetings.

### Qualcomm

SOFTWARE ENGINEERING INTERN

*San Diego, CA*  
*June 2017 - Aug. 2017*

- Worked on the core Android platform team to test over-the-air (OTA) upgrades on several Qualcomm powered Android devices.
- Performed fail-safe testing to ensure proper functionality during OTA updates and bootup.

### U.S Naval Research Laboratory

COMPUTER ENGINEER INTERN

*Washington D.C*  
*June 2016 - Sept. 2016*

- Developed object localization algorithms through convolutional neural networks for deployment on IBM's TrueNorth neuromorphic chip and for use on an underwater robotics program.
- Implemented a selective search and sliding window based approach to localization.
- Trained a CNN to place bounding boxes over objects of interest with a classification accuracy of 92.86%.

## Projects

### Conversational Chatbot

WRITTEN IN PYTHON

*June 2017 - August 2017*

- Trained a sequence to sequence deep learning model on my social media conversation logs to create a chatbot that talks like me.
- Deployed the trained model to a server using the Flask framework and hosted using Heroku.

### NCAA Basketball Machine Learning Model

WRITTEN IN PYTHON

*February 2017 - April 2017*

- Trained a machine learning model to output the win probability of two basketball teams, given information about relevant statistics for the specific year.
- Predicted the winners of past games with a 76.37% accuracy using gradient boosted regression trees.

## Communication

### Technical Blog

[HTTPS://ADESHPANDE3.GITHUB.IO/](https://adeshpande3.github.io/)

*July 2016 - Present*

- Wrote several deep learning tutorials on topics such as convolutional neural networks, reinforcement learning, and natural language processing.
- Received over 250,000 website users and over one million page views.

### Author

O'REILLY MEDIA

*January 2017 - Present*

- Published a video tutorial on using Tensorflow to apply deep learning to the task of sentiment analysis.
- Co-authored an article on creating generative adversarial networks with Tensorflow.
